2020 * *** 1.5.4.4=20200425 *** * 1.5.4.3=19200418 *** * 1.5.4.2=19200417 *** * 1.5.4.1=19200416 *** * 1.5.4.0=19200415 *** This is the program I've used: find. -name "*.mp4" -print0 | xargs -0 -I{} find. -name "*.mkv" -print0 | xargs -0 -I{} "rm {}" But it removes.mkv files from the drive too. What I actually want is to remove those.mkv files (and not.mp4 files) from that drive. I'm a real noob when it comes to these things, so please don't be too hard on me. A: How about: find. -name "*.mp4" -print0 | xargs -0 -I{} find. -name "*.mkv" -print0 | xargs -0 -I{} "rm -i {}" The -i (--in-place) option for rm deletes the file on the command line. Or, you could use rmdir to delete the directory: find. -name "*.mp4" -print0 | xargs -0 -I{} rmdir {} find. -name "*.mkv" -print0 | xargs -0 -I{} rmdir {} Sunday, July 14, 2013 Lion Out of Africa – MGM Classic Film It is hard to believe that it is 50 years since the release of the MGM classic Lion of Africa. The movie is an adaptation of the story of Mara, the lioness who became the matriarch of an African pride. Mara loved her cubs dearly. She was a good mother. And as her cubs grew, she seemed to get more intelligent as well. One day Mara decides that she will leave her pride. On the hunt she comes across a fellow 82157476af
